

GRX Network Solution - INPackSM

As the predominant GRX provider in North America, the Syniverse INPack GRX Network Solution is robust and scalable with the capability to meet your needs as you grow and expand internationally.

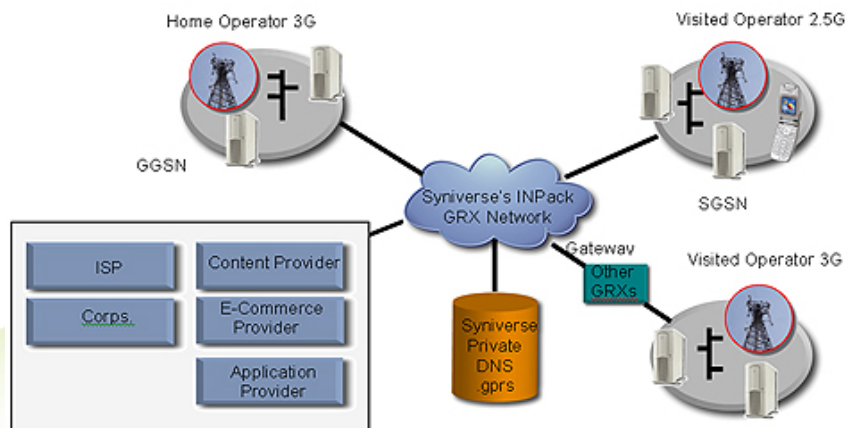

INPack is the Syniverse **General Packet Radio Service Roaming Exchange (GRX)** offering for GPRS. As the predominant GRX provider in North America, the Syniverse INPack GRX Network Solution is robust and scalable with the capability to meet your needs as you grow and expand internationally.

Benefits of INPack GRX

- Provides the opportunity to increase ARPU and roaming revenue.
- Gives your subscribers seamless access to their data network while they roam nationally and internationally, regardless of your roaming partner's GRX network provider.
- Offers secure and reliable transport of data.
- Provides you with global reach via a single point of connection to Syniverse's secure IP network.
- Integrates with Syniverse's mobile data roaming solution, allowing one network to be used for all of your mobile data roaming needs.
- Positions your network for future IP solutions.
- Offers a smooth transition to 3G technology.
- Upgradable to MPLS Network (CoS, QoS), which enables IPX, the next-generation network including voice, video and data.

Features of INPack GRX

- Secure network using the latest IP security methods of IPSec and 3 DES encryption.
- In addition to data roaming, GPRS can also be the network access and transport mechanism for multiple traffic types, e.g., C7 or SS7 messages, MMS, SMS, ENUM and CDRs.

Syniverse Technologies

Serving more than 800 communications companies in over 160 countries, Syniverse Technologies (NYSE:SVR) offers market-leading solutions that simplify the complexities of roaming, messaging, network interoperability and business intelligence for mobile operators, MSOs, enterprise verticals and emerging mobile providers.

- Offers a number of network solution sets, such as point-to-point circuits, IP-managed circuits or Internet VPN.
- Root domain name service for the .gprs domain.
- Network monitoring 24 hours a day, seven days a week to ensure service level agreements are met and/or exceeded.
- Trouble isolation, referral and escalation to all customers and interconnecting networks.
- Online reporting tools.
